

The difference is beautiful™

Henry Margu circa 1951 as he was making preparations to establish the company.

Trend-setting styles, cutting-edge colorations, incomparable quality and relentless dedication to our customers has secured Henry Margu's position as a leader of the "alternative" hair industry.

Since Henry Margu first came on the scene in Philadelphia in 1951, family ownership developed the company into one of the most well respected international brands of hair fashions. From a humble beginning in the store front millinery shop of the family house, the perseverance and dedication of the Margu family has made us the oldest and most experienced wig manufacturer in the U.S., 75 years and counting!

The design staff at Henry Margu has focused on developing exquisite fashions while achieving the highest quality standards for our products. While Henry Margu continues to grow, our core values and strong family culture have not changed.

We strive to be the best in every detail, produce the finest quality, provide the most exceptional service, while never losing sight of our goals! Still family owned since 1951, HM continues to carve its path in the industry based upon the same principles with which the company was established decades ago. The driving focus of our efforts is for one purpose... the satisfaction of our customers.

The difference is beautiful!™

Heat Mode *Air*

Heat Mode fiber has produced stunning results! Our new heat resistant fibers have quickly become the most sought after in the market today. Heat Mode AIR has taken these fibers to a new level. Light in weight and density, Heat Mode fibers look more realistic and natural, and match our regular synthetic highlighted color range. Take the heat up to 350°F, the options are endless!!

Human Hair Wigs

Intricately handcrafted to the smallest detail and offering exceptional comfort while looking amazingly realistic. Premiere utilizes 100% Remy hair with the cuticle layer preserved. Premiere Remy hair is healthy, smooth and soft. The strands of hair are meticulously knotted into the cap by hand. A monofilament top and lace front simulate realistic hair growth. Salon inspired highlighting techniques create the most realistic colors for every Premiere wig. Premiere is the ultimate in luxurious hair.

Human Hair Enhancement Styles

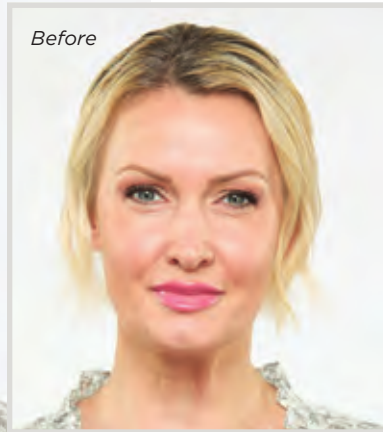

Premiere enhancement pieces are produced with healthy and soft Remy hair. Our Remy hair can accentuate any hair style by seamlessly blending with a woman's own hair and integrate perfectly for an amazingly realistic appearance.

All Premiere enhancement styles are produced with a monofilament base for natural styling with a center or side part and a polyurethane circumference if tape is necessary.

Synthetic Hair Enhancement Styles

Regular Synthetic Blended Fibers

Well designed and an amazing alternative to a wig. A simple solution for fine or thinning hair, our enhancements add fullness and body while easily blending into a woman's own hair. With focus on the fiber density, highlighting techniques and comb placement has resulted in styles that offer women the hair of their dreams. The enhancement styles on the following pages are produced in regular synthetic fiber for easy care and maintenance.

ACCESSORIES

Secure Grip

The perfect accessory to achieve a secure fit for wigs. Elasticized velour fabric with a Velcro closure comfortably stretches to secure wigs and other headwear from slipping or moving on the head.

Available individually packaged in Beige, Black and Brown.

Lace Grip

Features the same application as secure grip. Includes a 3 inch lace area to fit comfortably and naturally under lace front styles.

Hair Care Products

Cleanse, Finish and Revitalize are specifically formulated to enhance and prolong the life of our exceptional wigs and hairpieces.

Henry Margu hair care products are available in cases of 12 eight ounce bottles.

NEW!

Heat Mode Revitalize

Spray on heat protectant mist is formulated specifically for Heat Mode and Human Hair. Creates a barrier when using heat styling tools, keeping strands hydrated, preventing breakage and dryness.

Wide Comb

Detangle hair with this wide-tooth comb, designed to gently glide through strands without pulling or snagging.

Comfort Cap

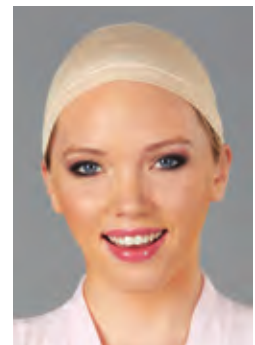

Mesh liner designed to keep the wig comfortable while preventing movement and slipping for a more secure fit.

Available in Beige, Black and Grey.

Bamboo Cap

Exceptionally absorbent, breathable and ultra-soft, our Bamboo Cap is incredibly cool and comfortable to wear. Hypo-allergenic with natural antibacterial properties makes it resistant to odor and bacteria.

Available individually packaged in Beige, Black and Brown.

Hairbrush

Flexible wire bristles that gently glide through synthetic and human hair.

Available in boxes of 12.

Wig Stands

Collapsible stands, ideal for storing/drying wigs.

CAP CONSTRUCTION

Traditional

Traditional cap construction features a fine net material in the top area. Weftings attached to stretch elastic lace make the open back creating better ventilation to keep the head cooler. This type of cap construction is often referred to as a “machine-made” cap.

Monofilament Crown

A Monofilament Crown (Mono Crown) cap contains a Mono area in the top area of a machine-made cap. This allows for the fiber in this area to have a more natural and realistic appearance that is flatter and with less volume in the top.

Open Cap/Featherlight

Open cap is commonly referred to as a “capless” wig due to the lack of net material used in the top as on a Traditional cap. The entire cap is produced with weftings attached to thin stretch elastic lace. Our exclusive ultra thin weftings create super lightweight wigs that are exceptionally comfortable to wear.

Lace Front

A lace front wig has a hairline made of a fine lace mesh in which each hair is individually hand knotted. The lace typically extends across the entire front hairline. A lace front wig appears as if the hair is growing directly out of the scalp and allows the fiber in front to be styled off the face in any direction.

Lace Front with Lace Part

A lace front wig that also contains a wide lace part area. This could be a center or side part. This cap style offers an extremely natural appearance.

Hand Knotted

A Hand-Knotted wig or Hand-Tied wigs are made with a soft stretch lace base. Each fiber is individually hand knotted into the base. This type of cap is lightweight and exceptionally comfortable. Hand-Tied wigs are produced with a Mono Top making them extremely natural looking.

Monofilament Top

Monofilament (Mono) is a sheer mesh used to make a transparent base that creates a realistic looking scalp area and is then hand-knotted with individual fibers to simulate the appearance of natural hair growth. The fiber in a Monofilament Top allows for multidirectional styling. A Mono Top feels smoother against the scalp than a Traditional or Open Cap and more comfortable as a result.

Monofilament Top with Lace Front

Mono Top with Lace Front wigs are produced the same as a Mono Top wig but utilizing a Lace Front as well to create the most natural front hairline. This allows for amazing off the face styling. These wigs offer the most natural and realistic appearance.

Hand Knotted Monofilament Top with Lace Front

This premium hand-tied wig combines a monofilament top with a lace front to create an ultra-realistic scalp appearance and a seamless, natural hairline. Individually hand-knotted fibers on a soft stretch lace base offer exceptional comfort, lightweight wear, and flexible parting from left, right, or center with effortless off-the-face styling.
